## Profile Summary

**Frontend Developer** with over **2+ year of experience** in Vue.js, React.js, and Nuxt.js, skilled in building scalable, responsive web applications. Excellent collaboration skills, with a focus on teamwork and delivering high-quality results in fast-paced environments. Eager to contribute technical expertise and drive innovation in a dynamic organization.

## Technical Skills

**Frontend Technologies :** HTML, CSS, JavaScript, Typescript, Vue.js, Nuxt.js, React.js

**State Management :** Vuex, Redux

**Frameworks/Libraries :** Vuetify, Bootstrap, Tailwind CSS

**Development Tools :** Git, Webpack, Visual Studio Code, GitHub, Postman, Bitbucket, Figma

## Professional Experience

### CodeNicely Software Services LLP — Associate Software Developer

Dec 2023 – Present

- Developed and optimized 5+ responsive websites using Nuxt.js and Vue.js, implementing best practices for mobile-first design.
- Integrated RESTful APIs, payment gateways, and advanced features like Google Maps for seamless functionality.
- Managed complex workflows and optimized state management using Vuex and Vuetify for intuitive UI design.
- Participated in client meetings and Agile workflows to deliver high-quality, scalable solutions.

## Projects

### Event Organisor and Buyer Platform

- Developed SSR-based platforms, including an Event Organizer Platform and a responsive Buyer Platform optimized for all devices, including mobile, tablet, and desktop.
- Integrated 5+ key features, including **Google Maps**, **charting libraries**, and over **100+ RESTful APIs** for advanced functionality and data visualization.
- Implemented the **Razorpay payment gateway** for secure and efficient transactions while ensuring seamless handling of large-scale data.
- Implemented **Zoho Sign API** to enable secure and efficient digital signing, enhancing the platform's functionality and user experience.
- Collaborated in **Agile workflows** to enhance team efficiency and project delivery.

### Enterprise Resource Planning (ERP) System :

- Integrated modular CRUD operations using RESTful APIs.
- Built dynamic forms, multi-level tables, and automated workflows.
- Integrated third-party APIs like **E-Way Bill** and **Invoice generation**.
- Implemented role-based permissions across all modules.
- Used Vuetify for UI and Vuex for efficient state management.
- Improved API handling and collaborated in **Agile** development.

### Expert Consultation Platform:

- Developed a web platform connecting users with experts across various fields for real-time guidance.
- Enabled users to **book 1:1 calls** with advisors for personalized consultations.
- Optimized UI/UX with Vuetify, ensuring a responsive and accessible interface.
- Managed state using **Vuex**, enhancing data consistency and application performance.

## Education

Bachelor of Technology in Mechanical Engineering - 2021
